

Jisc digital capabilities pilot

Strategic review

Pre-visit requests:

- » Are there any **special project(s)** or initiatives(s) in digital literacy/capability that provide a context for the Pilot Plus process? Include any blog post(s), web site(s) or other references for information.
- » Please list and provide (links to) any **strategic documents**, statements, frameworks or initiatives that are relevant to digital capability. Please highlight the relevant sections for us to review with you.

Discussion points during visit:

- » Who will **benefit** from the Pilot Plus process and what do you anticipate the benefits will be?
- » What are the most important **strategic drivers** for developing digital capability? Consider statements made in the strategies you have included, and other public statements by your organisation.
- » Who is responsible for **leading** and **building** digital capacity across the organisation? Have they all been included in your Pilot Plus meetings with Jisc?
- » **What support** is available to staff and/or students who want to develop their digital practices?
- » How are digital capabilities integrated into the **curriculum** (e.g. with a mandated framework, graduate attributes, plug-in modules etc)
- » What are the **best aspects** of your organisation's provision and support for digital capabilities? Where are there real successes?
- » What are the **weaknesses** (if any) in your organisation's provision and support for digital capabilities? Where are there real challenges?
- » What are the most significant **opportunities** to develop digital capabilities in your organisation?
- » What are the most significant **threats** to the organisation if digital capabilities are not effectively supported?
